## **DETAILED ACTION**

### ***Drawings***

1. Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Specification***

2. The disclosure is objected to because of the following informalities:
- Page 5, Line 22: The phrase "so providing" does not appear correct. This may read --to provide--.
  - Page 6, Line 29: The word "know" should be replaced with --known--.
  - Page 7, Line 15: The verb "arrange" should read --arranged--.
- Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

Art Unit: 2612

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 10 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 10 recites the limitation "the Direct Digital Synthesizer" in line 3. There is insufficient antecedent basis for this limitation in the claim.

5. Claims 1-9 and 11-21 are allowed.

6. The following is a statement of reasons for the indication of allowable subject matter:

The RFID tag communication device taught by **Nagai et al** [US 2007/0120650] teaches the claimed subject matter, such as the transceiver modules having reference frequency generators (No. 118) and communications ports (No. 148) allowing the control units (No. 112) to communicate with a LAN system. However, the priority date of the instant application pre-dates the priority date of the Nagai reference, rendering the claims allowable over said reference.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

**Campana, Jr.** [U.S. 5,714,937] provides omnidirectional reception of radio transmissions.

**Christ** [U.S. 5,977,913] uses coaxial cable in a personnel location apparatus.

**Martinez et al** [U.S. 6,429,775] transports RF power to RFID transponders.

**Belcher et al** [U.S. 6,812,839] uses a rotating magnetic field to enhance communication with RF tags.

**Boyd** [U.S. 7,218,229] includes receivers in loosely coupled networks.

**Jarvis et al** [U.S. 7,317,378] adjusts the power level in an RFID system.

**Hyde et al** [US 2006/0244598] reject the distortion caused to wireless signals by interference in the environment.

**Kim et al** [US 2008/0290997] operates a frequency synthesizer according to a clock signal.
